evota

In Conference / Huddle Room

Evota EI Series enhance your meeting experiences. Work together in an effective and efficient way, collaborate, share, annotate, conference and more. Being android powered you can plug in and start showing presentation, display documents, video directly from pen drive and annotate on screen and save as image for future reference without PC. It's Interactive multi touch technology gives businesses the opportunity to present and collaborate efficiently.

Class Room & Training Room

Evota EI Series turns a typical classroom into a fun learning environment for both student and teachers. It enriches classrooms in several ways by providing hands on collaboration and creating the perfect learning, allow different forms of media including images, photos, illustrations, maps, graphs, and video, to be displayed. These tools not only enrich the classroom experience but also help to expand the nature of content that can be used in learning. It makes learning to be more dynamic owing to the different forms of presenting information. This allows students to become part of the process, rather than simply recipients of prepared information.

In meetings

Evota EI Series enables meeting participants to engage with the information being discussed, files can be easily shared, accessed and saved on display. You can iterate in real-time, making changes to whatever topic is at hand as you receive feedback from your colleagues also annotate all office documents making virtual changes within it and it will further improve your communications and document workflow. At the end of the meeting or presentation, the meeting leader can email, print, and share everything that came up in the session.

Public Information & Control Room

Evota EI Series with Full HD / Ultra HD resolution offer best-in-class reliability with the stunning image quality. Available in Sizes from 55" to 98" the multi touch displays come standard with commercial-grade features required for digital signage, information kiosk, corporate, and control room environments. Reliable and designed with high-quality visual resolution is interactive and promotional at the same time to get the attention of target audience.

In Video Conferencing

Evota EI Series not only can be used as video conferencing display device but also allow you to annotate on real time. Same time you may even connect your laptop and pen drive with multi touch display for sharing the office content within our group sitting at place. In PIP mode one can use the screen as a board to note down the minutes of meeting for self-record. Easy-to-use software provides the essential tool set for collaborating on-screen.
